I think that would work for us. I will talk to HW. I'm pretty sure they will have the steel sets in by then.

I could drive down Wednesday 12/2 and return on Friday 12/4. Would that be ok with people's schedules?

Christoph

Byron and Christoph,

Please arrange for a field inspection of the Steel set installation – in particular related to the

planned installation of the flow control fabrication and installation. It would likely be appropriate to make plans for this during the week of 11/30. Let me know your ability to perform that task.

Thank you,

Steve

Subject: RE: Gold King Budget Update - Deere/Ault

We agree and can provide the qualified staff from our Boise office. The budget update that I sent out yesterday includes the prefabrication meeting on Tuesday and 2.5 days on site during installation. We can discuss installation time and additional shop visits during the call.

Matt and Christoph,

It is preferred that we someone form Deere and Ault be onsite to inspect the Flow Control Structure before delivery and during installation. Please let me know your thoughts and ability to provide that coverage.

Thank you,

Steve

Subject: Gold King Budget Update

Hi Steve, Matt, and Byron

Attached is the weekly budget update and projection. I adjusted the schedule per our conference call on Tuesday. As usual, numbers through last Friday are actual. The rest are estimated/projected.
